

Workplace injury

It is estimated more than 200 people in the UK are fatally injured at work every year.

In addition, around 150,000 non fatal injuries are reported, while an estimated two million suffer from ill health caused, or made worse, by work.

So having trained first aiders in the workplace goes beyond being a legal requirement.

What we do

Our experienced team of first aid trainers will help your employees attain the highest levels required for workplace competency.

What we offer

A wide range of effective and affordable first aid courses to empower the employee with the knowledge that may help save their colleagues' lives.

We offer standard training courses or bespoke ones specifically tailored to an organisation's requirements and budgets. Either course type can be delivered at our own training facility or at a client's premises.
